

Appln. No. 10/091,333
Amendment Dated April 16, 2007
Reply to Office Action of November 14, 2006
Replacement Sheet

ABSTRACT OF THE DISCLOSURE

An RNA molecule that targets mRNA encoding a polypeptide having the amino acid sequence of SEQ ID NO:10, can result in the prevention of processing, splicing, transport or translation of the mRNA or in degradation of the mRNA. The RNA molecule preferably is the complement of at least seven nucleotides of the target mRNA.
